

Liberal Vannin Party

Protecting the Future of Mann

House of Keys General Election Thursday 23rd November 2006

X VOTE ROY REDMAYNE

CASTLETOWN

'Roy has impressed me because I Know he will bring real substance to politics. His straight talking and common sense approach to addressing the real issues has been so lacking in Government for such a long time.'

Peter Karran Liberal Vannin Party Leader

Liberal Vannin

THE NEW FORCE FOR GOOD GOVERNMENT FOR ALL THE PEOPLE OF MANN

www.liberalvannin.im

ROY REDMAYNE

Your Liberal Vannin Candidate

Dear Constituent

As a Castletown resident you can once again exercise your democratic right to vote. I am pleased to introduce myself to you as your Liberal Vannin candidate for election to the House of Keys on 23rd November 2006.

A 56 year old Manx man, my connection to Castletown goes back to the 1930's when my father's family came to live in Douglas Street. The name of my uncle, Douglas Redmayne, can be seen on the Castletown War Memorial and on Sunday 12th November at 11am I will be paying my respects to him.

Living and working in the south of the Island after marrying local girl Maureen Montgomery in 1970, we now have three children and three grandchildren. Like many locals, I started my career at Ronaldsway Aircraft Company before joining the Lancashire Constabulary in 1972, where I rose to the rank of Inspector with the Greater Manchester Police before retiring in July 2002. We chose to return to Maureen's roots and live in Castletown upon our return to the Island.

My decision to stand for the House of Keys was made following a four year battle with a system which is incompetent and lacks accountability to the public. My campaign to achieve an Independent Police Complaints system has recently been accepted unanimously by Tynwald. This was just one of the local and national issues that now need to be addressed.

Planning: - has been a major concern in Castletown. Three recent developments in the town have been given the go ahead with no consultation with the local people. It is essential that the local MHK works in partnership with the commissioners and consults with the public to design and implement a strategic development plan for the town. This plan would ensure that all developments protect our heritage whilst serving the needs of the community.

Parking: - Adequate parking is essential, not only for residents but also to attract customers to our businesses and our historical sites. Castletown is sadly lacking in this area and we have seen no commitment to improving this situation.

Town Centre: - Our ancient town centre is looking sadly neglected. We have a new development underway but this must not be at the expense of the square or Malew Street and Arbory Street where there are empty shops and litter and chewing gum spoiling the pavements.

Crime: - Many are concerned about the level of crime in the town. We are seeing increasing vandalism and theft from cars and properties. There must be adequate policing in the town and there must be resources available for this.

Environmental Issues: - concern us all from litter and dog dirt to recycling and renewable energy. These are local and national concerns and government must support, finance and put in place legislation to protect our environment for both ourselves and future generations.

National Picture: - Nine candidates of the Liberal Vannin Party (including myself) are building a national picture of the needs, hopes, aspirations and expectations of the people of the Isle of Man. The party is committed to addressing the real issue - the reputation of politicians, politics, and our government system. Liberal Vannin wants to see common sense at the very heart of Manx politics - something which is currently sadly lacking!

We have the determination and tenacity to work for change and to put right the wrongs that we see around us. I will represent the Liberal Vannin Party in this election because the values held by the Party are those that I, too, hold dear.

Accountability

Transparency

Openness

Honesty

A vote for me, Roy Redmayne, will ensure that you receive open, honest, accountable representation for our town. We will ensure that your voice is heard and that you are consulted about the real issues that concern you - the people of Castletown. Please help me to help Liberal Vannin make a real difference - entrust me with your vote on 23rd November 2006.

Thank you,
Roy Redmayne

Vote Roy Redmayne

1 Addressing the Housing Crisis

Nests for People not nest eggs for investors

The Problem

The fundamental problem is the lack of affordable housing right across the Island. Young professionals, first-time buyers, families, Manx workers, people recovering from broken homes, and key workers find it increasingly difficult to get their feet on the first rung of the housing ladder. For many it is now totally out of reach!

The Danger

Liberal Vannin is committed to introducing realistic and workable measures to address this issue head on. Put simply, if people cannot afford to live here they will leave the Island! This will have a devastating effect on our entire economy and the prosperity of the Island as a whole and hence our ability to care for our citizens.

The Solution

Liberal Vannin is prepared to take the radical steps needed to secure affordable housing to enable the long term stability of our economic base. We are therefore proposing the creation of a new “Protected Local Housing Market” as seen in other parts of the world. This policy is designed to create nests for people and not nest eggs for investors.

This new layer in the property market place will be subject to strict conditions to ensure the system is not open to abuse. The proposed criteria being:-

- Owner occupied (they may not be rented)
- Restricted to Manx workers (similar to council house qualification criteria)
- Will be open to both existing council tenants and other Manx workers
- Supported by a number of government initiatives including:
 - Government backed Part-Equity Mortgage schemes
 - Release of government owned land for development of affordable housing
 - Incentives for ‘brown field’ development initiatives
- Will include both properties from the existing housing stock and new developments

Our goal is to provide affordable homes for ordinary people in ordinary streets in ordinary towns and villages throughout the Island. Restrictions will be put on the property regardless of its location, thus creating a steady supply of housing stock to meet the local housing demands of the Manx workers in areas where they want to live.

Raising the Rental Standards

Research by the Policy Team revealed a startling gap between the quality (and hence living standard) of rental properties at the lower end of the market compared with the rest of the market.

The Liberal Vannin housing policy also includes a commitment to establish an “Approved Landlords Registration Scheme” whereby professional landlords work alongside government housing standard officers to comply with a new minimum standard for rental properties. This is just one example of the realistic public / private partnership where the net result is a win / win for all involved. The tenants will be happier to make long-term rental commitments; this supports landlords by providing a long-term and secure income to protect their investments. Everybody wins!

Sheltered Housing

The Liberal Vannin Party believes that in order to house the vulnerable and needy there must be partnership between the DOLGE and the DHSS to establish small units of sheltered housing. These units would be for groups such as senior citizens, the homeless, and people in recovery from drug and alcohol addictions. Such units must receive proper funding with accompanying support schemes such as counsellors, therapists and social workers. The Provision of a young chronically sick facility and long-term respite care unit is long overdue.

Long-Term Planning

Liberal Vannin is committed to creating and implementing a strategic plan for the Island to support our plan for long-term economic growth. Currently no long-term strategically coordinated plan exists; the last one was agreed in 1982, which results in pockets of developments without any thought being given to the “bigger picture”.

We need to provide the facilities where they are needed and where they can support a sustainable economy in the long term.

2 Facing the Facts on Immigration

A Prosperous and Caring Society, NOT Unlimited Immigration

The facts on immigration are very simple. We are a small Island with limited resources, limited space, and a limited economy with limited support infrastructure. We cannot - and must not - continue an unrestricted “open borders policy”. The UK has given control of its borders away to the EU with devastating social impact and we are at risk of following suit.

We have a range of treaties and regulations including the common travel area with the UK and Ireland, Protocol 3 with the EU, the Work Permit system, and the Residency Act which has yet to be made law. The existing agreements are far from robust – in fact it leaves us “wide open!”

Liberal Vannin is dedicated to both facing the facts and implementing radical immigration policy changes to protect the Island for both our citizens of today and for our future generations.

Our research shows that the best policy for the Isle of Man is a policy of controlled immigration supplemented by an effective system of border control where economic migrants from the UK, Ireland, Europe and the rest of the world are treated equally and fairly and entry is based wholly on the economic benefits they can bring to the Island economy.

One of the most successful economic migration policies and systems in existence has been created by the Australian Government. Australia enjoys a magnificent standard of living and continued economic prosperity. Liberal Vannin is committed to updating our Treaties and Regulations in such a way as to maintain the privileges for Manx citizens in travelling and working abroad, whilst limiting immigration to the people we need.

3 The Economy

Making “Freedom to Flourish” more than just a slogan

Liberal Vannin is committed to a sound and growing economy.

To this end, steps will be taken to reduce the Net Financial Liabilities that have been built up by the government, by reducing the cost of the public sector, through the introduction of an emphasis on value for money.

It is widely recognised that the majority of the economic prosperity over the last 15 - 20 years can be attributed to the efforts of the finance sector. This has not been without its challenges to which the Isle of Man has regularly and commendably tackled issues raised by organisations such as the OECD, FAFT and the EU.

However, the EU views the Isle of Man and similar jurisdictions as a serious threat to its tax harmonisation policy. The EU must not be allowed to impose damaging legislation which will harm or destroy our finance industry. It is therefore, imperative that any economic policy has, as its foundation, diversification into other areas. It is simply common sense to spread our risk.

The Charteris Report

Liberal Vannin advocates the need to diversify the economy and will take steps to implement many of the recommendations of the Charteris Report. The Party is committed to looking beyond the Charteris Report and develop the economy in other areas such as tourism, farming, alternative energy, space and other high-tech areas. We also see a golden opportunity to build on the success of the Douglas Marina example and create additional marinas in key strategic areas such as Ramsey, Peel, Port Erin and Port St Mary. As part of our economic diversification strategy we see a need to develop a strong and buoyant professional service industry in IT, e-commerce, specialist consultancy, legal and professional services, medical services, professional development and training.

Heathrow & Europe

Additionally the physical infrastructure and transport system to and from the Island needs to be developed and enhanced. To support business, tourism and travel needs of the people of the Isle of Man, Liberal Vannin is committed to finding ways to protect the London City route, the reintroduction of the Heathrow route and establishment of direct routes to other European destinations to make our economy more accessible to other business centres.

Real Support for Small Business and Entrepreneurs

Liberal Vannin is committed to supporting small businesses and entrepreneurs to develop new sectors of the economy. We support the creation of a Business Facility whereby small businesses are supported through the early years which is their most vulnerable time.

We will actively investigate and seek to create a local venture capital market so small businesses have access to the full range of funding and support options they require to expand and grow.

Reducing the Burden of Bureaucracy

Liberal Vannin is committed to ensuring that all regulations are responsive to business needs and maintain a realistic level of quality control. Liberal Vannin firmly believes the regulations should support business and not restrict it. We will take a commonsense approach to ensure we work with business and not against it.

Continuing Development for All

Liberal Vannin Party is committed to establishing opportunity for continuing development for all people. The change in best practice in all areas of work requires the Island to invest in Continuing Development of its workforce. The government is by far the largest employer on the Island and Liberal Vannin will be looking to ensure that by good training and leadership, the productivity of the public sector improves.

Farming for Profit - Setting a New Standard

Liberal Vannin will develop a sustainable agricultural policy which will promote 'quality over quantity' with the possibility of the Isle of Man becoming the first totally organic farming nation and a centre of excellence in small-scale agricultural methods. We

recognise a great opportunity for the farming community to set standards in the creation of new markets in the provision of high quality, high value foods and to follow and promote compassionate farming methods. Animal health and welfare has to be of the highest priority and we would seek to guarantee this as part of the Manx product name. We will develop a strategy to support diversification into new markets such as a national distillery to broaden the base for the grain sector and a natural herbal and scent industry involving lavender farms which would also enhance tourism on the Island. Industries like these offer imaginative opportunities to further develop and widen the agriculture base on the Island.

Protecting Our Environment

Liberal Vannin is committed to “Sustainable Development” for the protection of our environment and supports the encouragement of a culture of recycling and environmental awareness. We are developing a ‘green’ policy and aim to invest in the appropriate technology and infrastructure to support this important environmental and economic goal in the spirit of the United Nations’ “Agenda 21”. As an integral part of this goal we will investigate tidal and wind power as a means of generating alternative energy sources for the Island.

4 Law & Order

Putting the Bobby Back On The Beat

Whilst we recognise the need for the accurate recording and administration of all police matters Liberal Vannin strongly advocates that the administration side of policing is better served by civilian personnel rather than police officers trained for front-line duty. We will provide an additional layer of administrative support to allow them to police our streets and neighbourhoods more effectively.

We are committed to a complete review of the penal system and its administration and want to move away from the statistical policing methods introduced over recent years and get back to real policing and performance based on tackling real crime. Furthermore, we will strive to reverse the stifling trend of “political correctness” which is restricting our officers’ ability to do their jobs effectively.

We will implement a policy of criminalising criminals and rehabilitating the misguided. For example, drug users should be offered the help and support they desperately need to “clean up their act” rather than going directly to jail. Drug dealers, on the other hand, should be handed harsher sentences and we should get back to the penal system that punishes criminals, rather than providing them with accommodation and privileges one would expect to find in a holiday camp!

Liberal Vannin supports the creation of a Police Authority and an effective independent complaints system to ensure that the Police are accountable to the public.

5 The Health Service

Giving Patients More Choice

Liberal Vannin believes that our well funded Health Service now suffers from unacceptably long waiting lists and in the restriction or delay of essential services. From talking to Health Service staff at the “grass roots level” it is clear that the morale is poor, whilst the motivation and dedication of the majority of the health service professionals is second to none.

Liberal Vannin believes that we can learn from other countries about methods of introducing more patient choice, which have the effect of improving the efficiency of the providers and the satisfaction and control felt by the patients.

We will be more pro active in health education and preventative programs. Investing in these areas now will reap dividends for future generations

The mismanagement of Health Service finances must be addressed as a matter of urgency. A complete review and implementation of an effective, efficient, and auditable financial accounting and management system to manage the Health Service is an absolute priority for Liberal Vannin.

Residential & Nursing Homes

Liberal Vannin believes that a review of this legislation is long overdue. This section of the community is one of the most vulnerable and the Independent Inspection Procedure needs to be broadened with lay input from interested organisations as part of the inspection procedures. Reports about these institutions should be open to public scrutiny so that residents and relatives are aware of any concerns surrounding these establishments. A total review of alternatives to this type of accommodation and funding for people entering these facilities is required. The Party would investigate a compulsory insurance scheme for the younger generation's long term needs.

6 Protecting Pensions

Providing certainty and fairness to pensioners

Liberal Vannin will ensure that policies are in place to safeguard the funding of both state and public sector pensions. We believe that state pensions should be linked to average earnings and not retail prices and we will investigate ways of funding this improved scheme.

To assist widowed pensioners we will introduce additional financial assistance for single pension households in the form of a 25% discount on general and water rates.

7 Education

Towards a Competent and Self Reliant Society

Liberal Vannin recognises that young people differ in their aptitude for academic and vocational learning. Our policy is to ensure opportunity is given to each individual to get the best out of themselves and make a valued contribution to society.

Academic Education

Liberal Vannin will protect the right of all our children to have a free education to help them to achieve their maximum potential in life and we will provide more parental choice in the selection of which school a student attends. We will ensure that children with learning difficulties are given the opportunity and resources to reach their full potential as part of an inclusive education system. We will cease the policy of 'buying in' services to deal with troubled and troublesome children and encourage parents to take a more active role to ensure their children do not behave disruptively and inhibit the educational opportunities of others. We are committed to review the current style of curriculum taught in schools, which is out of date. We will address the issue of diminished morale among the teaching profession as a result of blindly following UK education reforms and look to more successful countries to learn of best practice. Liberal Vannin will continue the commitment of providing grants to Manx students wishing to further their studies at University level.

Vocational Training

Where these courses suffer from insufficient numbers to make them economically viable we will make up the numbers by offering spare places to both UK and Irish based fee paying students or to third world support organisations such as Christian Aid as part of our commitment to overseas aid programmes.

Mature Students

Liberal Vannin will develop a progressive policy of both academic and vocational education for mature students in areas of skills shortage with financial assistance where appropriate.

We will work towards making the apprenticeship schemes more financially viable for both students and the employers. Liberal Vannin is committed, where possible, to providing educational courses on the Island to give the opportunity to those who have family commitments and who are seeking a change of career.

8 Government Reform

Getting more value from the Public Sector

The Scope and Structure of Government

Liberal Vannin welcomes the report of the team that reviewed the “Scope and Structure of Government”.

Liberal Vannin supports their observations that the current structure of the public sector is unsustainable and needs to be addressed under five general headings of:-

1. The Scope is too large;
2. There has been insufficient emphasis on value for money;
3. There is a necessity for greater working together across government;
4. There is a great need to redefine and separate the roles of the politician and the public sector manager;
5. There is a need for more transparency and openness to improve public understanding and debate.

Liberal Vannin is committed to implementing the recommendations of the report with priority given to the creation of a new department of Corporate Development as a driver for obtaining value for money in the public sector. Some of the recommendations might prove controversial and after further study the people of the Island will be given the chance to vote in referendums on each controversial issue.

Audit of Government

Liberal Vannin believes that every minister should have a ‘shadow’ that will be responsible for scrutinising the ministers actions and decisions and hence holding him/her responsible in the House of Keys. This is the only way to get auditability and transparency into the system to ensure the best policy choices.

Liberal Vannin will support ‘A Conflict of Interest’ legislation, a Freedom of Information Act and a Public Accounts Committee whose membership is free of Departmental responsibility and supported by lay input, to give it the additional skills base it needs to protect the public purse.

Liberal Vannin will support the long overdue Ombudsman for the Island’s residents.

Ministerial Reform

Liberal Vannin advocates that all representatives of the people should be elected by the people.

A fundamental flaw of the current system is that unelected members of the public may be appointed to Ministerial positions and exercise Ministerial powers without the democratic mandate of the people. Liberal Vannin firmly believes that only members of the House of Keys should be appointed to Ministerial posts as it is only MHK’s who carry the mandate of the people.

Bringing Government to the People

Liberal Vannin is committed to actively encouraging the regeneration of towns such as Ramsey, Peel, Port Erin, Castletown and other areas. This will have an obvious beneficial impact on key issues such as traffic congestion, parking, air quality and the environment in general. It will encourage a much-needed boost to the local economies in these areas and the Party is committed to "leading by example". Liberal Vannin is committed to the redistribution of public sector employees to the major towns of the Island by moving both back office and front office government functions. Furthermore, the distribution of some front office activities to local towns will have the added benefit of the public not needing to travel to Douglas to conduct their business with government.

Roy Redmayne

**Your
Liberal Vannin
Candidate
for Castletown**

Dear Voter

I am both delighted and honoured to be able to choose from such a strong team of candidates from all walks of life enabling the Party to present a viable and realistic alternative to the current government system.

I have fought on my own on the real important issues to get basic common sense to prevail. I have witnessed the continual mismanagement of so many capital and revenue projects which undermines the long term financial health of our nation.

We need to improve our government so that we can maintain the benefits such as the pensions, family allowance and student grant system that are so much better than those of our UK neighbours.

Liberal Vannin will work as a team to get audit and accountability into government. Liberal Vannin will develop the economy, address issues such as the housing crisis, uncontrolled immigration, the health service and law and order to protect the very things we love about the Island's way of life.

Each member of the team has been carefully selected on the strength of their skills, previous experience, and commitment to Liberal Vannin's vision for the future of our Island.

*I hope you will support **Roy Redmayne** in the forthcoming election and help to protect the future of Mann.*

*Protect your future by voting **Roy Redmayne** on the 23rd November!*
